

New for FlexFusion Combi Ovens:

Grease Collection System

The most efficient way to recycle your combi's cooking grease

Features

- Fully integrated system compatible with all FlexFusion models
- Actively pumps excess oil, fats, and liquids out of the FlexFusion
- Excess oil, fats, and liquids are collected in a dedicated container
- Produces clean wastewater
- Minimizes water consumption
- Easily activated during step-by-step cooking process
- Self-cleaning via WaveClean
- Does not require separate electrical supply – fully integrated

Energy Efficient System:

- Clean wastewater
- Collect recyclable oils, fats, and liquids
- Safely dispose of cooking liquids
- Neutralize environmental impact
- Produce valuable raw materials

Collects **99.9%** of excess oil, fats, and liquids from cooked products

99.9%

Actual test results

NOT JUST EFFICIENT, BUT PROFITABLE TOO

Sell Your Waste

All around the world, companies are recycling food waste, including cooking oils and byproducts like the ones actively pumped out by the FlexFusion's Grease Collection System. Among other things, these companies can produce green biodiesel from recycled oils and fats.

Is It Worth It?

Depending on variables like the monthly quantity collected and degree of contamination, this recycled waste sells for around \$0.50 per gallon.

Why FlexFusion with Grease Collection System?

High volume / high fat products that require a longer roasting time (like chickens and ducks) produce large quantities of fat, oil, and water. Without a collection system, these byproducts are useless. The Grease Collection System almost entirely separates oils and fats from the wastewater, meaning what's leftover is less contaminated and ready-to-sell.

Let's Talk Return on Investment

ROI Calculation Example (FlexFusion Platinum 115)

300 Chickens Per Day
Number of Loads Required

HP Model 115

12

Other Combis

20

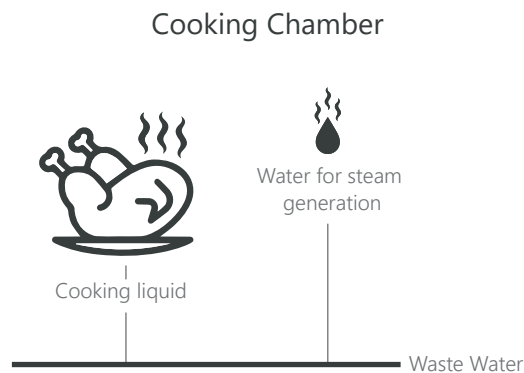

30 Chickens per load
5 lbs each
Produces ~1 gallon of grease

	Annual Per Store	Ten Year Return			
		1 Store	5 Stores	10 Stores	20 Stores
Production Time Saved	2,880	28,800	144,000	288,000	576,000
Labor Savings (Based on \$8/hr)	\$23,040	\$230,400	\$1,152,000	\$2,304,000	\$4,608,000

	Annual Per Store	Ten Year Return			
		1 Store	5 Stores	10 Stores	20 Stores
Gallons of Chicken Grease Sold	3,600	36,000	180,000	360,000	720,000
Chicken Grease Revenue (\$0.50/gallon)	\$1,800	\$18,000	\$90,000	\$180,000	\$360,000

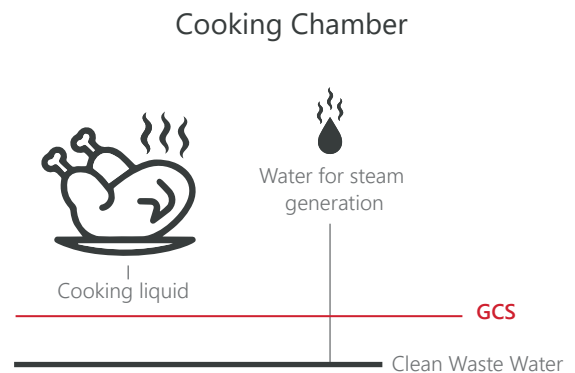

FlexFusion Grease Collection System made simple:

Without Grease Collection System (GCS):

Liquids from cooked products mix with other liquids in the cooking chamber and get into the waste water.

With Grease Collection System (GCS):

99.9% of the liquids from cooked products are collected by the grease collection system and do not get into the waste water.
