

Henny Penny's 2-in-1 WaveClean™ Cartridge

Automated Cleaning System

There's "clean" and then there's WaveClean™.

Henny Penny combi ovens are built with easy cleaning in mind. In three steps or less, you can initiate the automatic 2-in-1 WaveClean™ cartridge system, which ensures your oven's tank, hoses and entire steam production system are perfectly maintained, and rid of mineral buildup. This is compatible with any of our Henny Penny combi ovens.

No heavy scrubbing required

The ability to set-it-and-forget-it means no hand cleaning, which helps keep your equipment in excellent working order for its life.

Compare to other products

Detergent and rinse-aid are combined in a single convenient cartridge that automatically releases each component as needed. Empty cartridges are safely recyclable. No additional plumbing, dispensers or bulk containers for detergent and rinsing agent are required.

Powerful cleaning and labor savings

WaveClean™ automated cleaning system, standard on all Henny Penny FlexFusion combi ovens, cleans effectively using less energy and 36% water than other automated cleaning methods.
